

Physical Requirements

NOTE: Seriously consider whether you are physically capable of hiking in the Grand Canyon. Excellent physical condition and endurance are critical to completing the hikes safely.

The Hiking Focused trip is specifically designed for guests who are willing and able to hike every day of their trip. Although none of the hikes on this trip are mandatory, participants will have a better experience if they're in good hiking shape. Some guests find they face additional challenges hiking in the Grand Canyon, especially adjusting to environmental conditions including heat, cold, elevation, weather, water, and sand. If you have factors that could make a trip more difficult due to age, weight, lack of conditioning, and heart or other diseases, consider talking to a doctor before committing. Please review our Risk Advisory to Health-Care Providers and Participants and our Visitor's Acknowledgement of Risk for more information.

Here are some minimum requirements to safely enjoy your journey:

- Able to hike every day. Some hikes may be multiple hours in duration.
- Able to fit into a Type 5 Life Jacket (max chest size 58")
- Able to hold onto the raft while going through whitewater. Ropes are provided throughout the raft for hand holds.
- Capable of climbing onto and off of the raft. There will be about a 2-3 foot step up/down from the raft to the beaches. Surfaces may be wet and slippery.
- Comfortable walking on uneven, rocky terrain. Trails in Grand Canyon are not regularly maintained. Also, sand beaches are the norm for camp sites, so make sure you are comfortable walking across sandy inclines.
- Able to carry your own personal gear to and from camp. The maximum weight for personal gear is 25 pounds.
- Able to tolerate prolonged/repeated exposure to water of 50°F
- Able to tolerate prolonged exposure to environmental temperatures up to 120°F (In colder months, temperatures may also drop to 30°F)

Note: We are happy to discuss other styles of trips that allow us to accommodate a wide range of physical challenges and medical conditions. Please contact our office so we can assist you personally with any concerns.

Pre-Trip Conditioning

Preparing in advance for the desert terrain can enhance your enjoyment as well as your ability to see some of the hidden gems the Canyon has to offer. Hiking trails are not maintained and include elevation gain, rocky terrain and even stream crossings. It's worth it to see that spectacular waterfall or phenomenal slot canyon, remember that all hikes are optional.

Conditioning before your trip will also aid in the camping experience. Most campsites are either sandy beaches or rocky ledges. Guests are responsible for carrying their own gear as well as setting up camp, so being physically fit will enhance this experience tremendously.

5 Great Pre-Trip Conditioning Activities:

1. Find and hike local trails that have elevation gain and loss.
2. Use the incline feature on machines at your local gym and take the stairs wherever you go.
3. Walk and hike on uneven terrain and rocky trails.
4. Purchase and break in hiking or cross training shoes and hiking sandals ahead of time to avoid blisters.
5. Get in the habit of drinking lots of water throughout the day – it's good for you every day, but mandatory on the river!
6. If by the balance due date, you cannot comfortably hike 6-9 miles, please contact our office.

Review our 12 Tips for a Better Hike on the reverse of this page before your trip.

Hiking in the Grand Canyon

Everyone who hikes in the canyon for the first time reports that it was more difficult than they expected.

Hiking in the Grand Canyon is a strenuous and potentially dangerous activity suitable for only those in excellent physical condition. If you have any history of ankle, knee, hip, or other joint problems, asthma or heart-related problems, or have recently undergone surgery, please consult your physician before attempting to hike in the Canyon. Temperatures typically exceed 100 degrees Fahrenheit (38 degrees Celsius) in the summer months.

Additionally, given that this is a group activity, it is important that you are physically able to participate with the group and be on time. Remember that your actions can affect the group experience.

PHYSICAL TRAINING BEFORE YOUR TRIP IS ESSENTIAL.

12 Tips for a Better Hike

1. EAT SALTY SNACKS almost as often as you drink. Balance your food intake with your fluid consumption so that your electrolyte levels stay within a normal range.

2. DRINK AT LEAST THREE LITERS of water and electrolytes per day. Do not wait until you feel thirsty—by that time, you are already dehydrated. Camelbak-style hydration packs work great with two backup water bottles. Note that bottled water in individual disposable containers is not sold in the park. You must bring refillable bottles with you.

3. REST at every opportunity and in shade when possible.

4. WEAR a **WIDE-BRIMMED HAT** and other skin-covering clothing for sun protection.

5. WET your hat, bandana and long-sleeved shirt at water stations.

6. PACK LIGHT. Take only what you need – and then double check it. Water should be your heaviest item.

7. PACE YOURSELF. A steady pace will not only prevent you from tiring too quickly, but will allow you to enjoy the scenery.

8. RESEARCH your trip. A Grand Canyon hike is not suitable for everybody. Make sure you read the summer hiking information on the Grand Canyon

National Park's website.

<http://www.nps.gov/grca/planyourvisit/hike-smart.htm>

9. PREPARE for your hikes by getting a good night's rest, eating a good dinner, and avoiding alcohol and other diuretics.

10. PRE-HYDRATE during your trip by drinking lots of **WATER.** Don't get behind!

11. WEAR COMFORTABLE SHOES and clip your toenails to avoid "black toe" and blisters.

12. STRETCH before you start, but prepare to have **SORE MUSCLES** the day after your adventure.
